Subject: RE: Preliminary TIC Data Request

Thanks, Wendy. I'll look for responses. Bill, I mentioned to Wendy that I learned that Mark LeChevallier is on his way to Charleston today (may be there already, or may be on your flight—Jeff McIntyre said he was coming at 3:30.) He has other meeting(s) lined up, but hopefully you can visit with him while you and he are there, and begin to discuss this ask (informally). If you do see him, he may also want to discuss the paper on residual chemicals, which we should broach (informally). --Vicky

Subject: Preliminary TIC Data Request

Sue and Eric,

Can you review this language to determine whether I have summarized correctly: Please reply to all with necessary revisions.

Here is draft language for the potential TIC data request:

Please provide VOC and SOC GC/MS raw data files, including chromatogram and spectra, for the following samples that were been analyzed using a full scan rather than targeted MCHM scan:

- Approximately 4 of the highest quantitative results for MCHM at locations in the distribution system
- Plant finished water sample showing high quantitative result for MCHM

Please clarify the instrument type, method used (Drinking water versus SW-846 type protocol), and preservative/quench agent.

THANKS!

Wendy
